

CAPABILITIES

Construction | Infrastructure | Engineering Coordination | Consulting

3DELTABRAVO (3DB) is an SBA-certified Service-Disabled Veteran-Owned Small Business supporting government agencies, prime contractors, and commercial clients with disciplined project management, construction coordination, infrastructure support, engineering-team integration, and technical services.

We build qualified teams around each requirement and emphasize compliance, accountability, safety, and responsive execution.

CORE COMPETENCIES

- Project and construction management, scheduling, coordination, and field execution support
- Civil/site and underground utility coordination, including water, natural gas, and electrical utility work
- Engineering and design-build coordination with qualified professional and specialty partners
- Facility repair, alteration, modernization, and technical support coordination
- Subcontractor, supplier, logistics, and heavy-equipment operations coordination
- Government project compliance, safety, quality, documentation, and stakeholder communication

WHY 3DELTABRAVO

- SBA-Certified Service-Disabled Veteran-Owned Small Business (SDVOSB)
- 20 years of U.S. Marine Corps Combat Engineer leadership and technical instruction
- Hands-on underground utility, construction, and heavy-equipment operations experience
- Qualified teaming network spanning civil construction, underground utilities, engineering, and specialty trades
- Disciplined Go/No-Go review, compliance controls, safety focus, accountable communication, and schedule control
- South Florida presence with statewide and nationwide federal support capability

RELEVANT PRINCIPAL EXPERIENCE

The experience below reflects company-principal experience and is not represented as 3DELTABRAVO corporate contract past performance.

Portwood Communications

Led underground construction crews installing electrical, natural gas, and water utilities; coordinated field operations, safety, and schedules.

Brown Construction

Directed underground utility installation teams; managed workflow, crew performance, and jobsite quality.

U.S. Marine Corps

20 years of Combat Engineer leadership and instruction with hands-on construction, electrical, plumbing, carpentry, heavy-equipment, and field-operations experience.
